

Virtual Classroom

The virtual workplace is becoming more prevalent due to trends in society and the workplace. Technology is enabling this shift, but the fundamental needs of the adult learner are not changing. Your employees have a desire to explore concepts, rather than be taught them. They want access to expertise and they want to share experiences during learning.

Powered by Zoom®, Dering's Virtual Classroom provides adult learners with a personal and engaging learning experience from a distance.

Philosophy and Approach

Dering's virtual classroom content library includes Leadership, Customer Service, Communication, Business Writing, DiSC® (Dering is an authorized DiSC® partner), and other topics. We can also produce/facilitate virtual sessions with your content, as well. We customize our content to fit each client's unique needs. Each session is hosted by an experienced Dering facilitator and a producer, who provides the technical and other support to track and enhance learner engagement. This allows the facilitator to focus on sharing concepts, debriefing breakout group activities, and eliciting learners' application of concepts.

Benefits. . .

- Virtual Classroom Desk Reference Card for your employees.
- Learners actively engage with the host and/or other learners every four to eight minutes.
- Virtual breakout rooms for small-group discussion and activities.
- Online post-session evaluation report.
- Access to session recordings (MP4) after each session.
